

**The FreeArm provides
a consistent way to eat at
the hospital, home and
on-the-go.**

Innovation from Experience

Misti and Will Staley needed an extra hand while gravity and pump feeding their son Freeman. Sadly, Freeman lost his battle with pulmonary hypertension at 10 months old. Freeman's brief life continues to inspire by helping nurses, dietitians, caregivers and Tubies of all ages through the FreeArm!

Patent Pending
FDA class one medical device
Insurance billable

Awesome stats!

42% of caregivers would spill a feed or medicine bolus without the FreeArm. **This fell to only 11% with FreeArm use.**

5% of caregivers were able to perform therapies while holding a gravity syringe. **This rose to 57% with the FreeArm's help.**

87% of tubies would spit up or vomit feeds without the FreeArm. **Now only 22% spit up or vomit feeds with the FreeArm's bendable arm able to standardize the feed rate.**

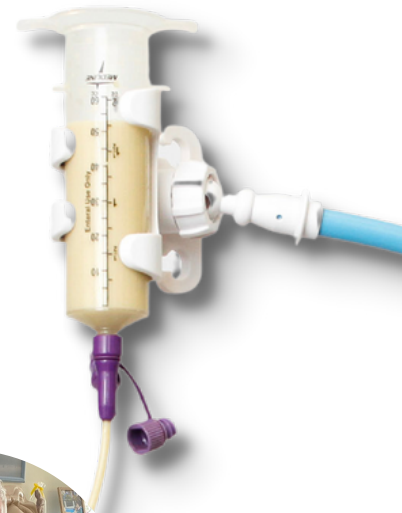

Gravity Syringe Feeds

Holds open syringe out of the way for venting the stomach, while improving patient safety.

Holds gravity syringe sizes 35ml to 140ml.

Personalizes feed rate with bendable arm.

The FreeArm frees hands during gravity syringe feeds.

Testimonials

Life is complex enough,
the FreeArm lends a hand.
