

FreeArm Care

GBUKEnteral
Part of the GBUK Group ●●●●

GBUK Enteral specialises in the supply of enteral feeding tubes, syringes, gastrostomy devices and enteral ancillaries.

Our comprehensive range of products enables healthcare professionals to safely deliver nutrition to their patients being cared for both in hospital and their own homes. GBUK Enteral is proud to be playing a central role in the ISO ENFit programme, introducing the new International Patient Safety Standard Connector. We take pride in our commitment to quality, clinical innovation and providing exceptional value.

Since GBUK was formed in July 2008 the organisation has continually delivered innovative products based on needs identified from clinician's feedback regarding the health, safety and the well-being of their patients.

We believe this is what makes the UK health industry the best in the world; UK clinicians are prepared to get involved & give their precious time to help companies like ours design, innovate and manufacture leading-edge products. However, we are not working on expensive medical solutions, we are working at delivering innovation and change to routinely used 'day-in day-out' medical products. We believe that our heuristic approach is unique within the healthcare industry and has resulted in the usage of GBUK products rising from 10,000 per day in 2008 to more than 213,000 today.

We have an active research & development team permanently engaged in discovering & developing new innovative products, as well as improving our existing ones. This enables us to continually deliver effective solutions & ensure that GBUK remains at the forefront of healthcare innovation.

FreeArm

The FreeArm lends a hand at the hospital, home and on-the-go

The FreeArm clamps to surfaces such as tables, cots, prams, you name it! Works as a travel IV pole, easily bending to fit in your bag.

Consistent feeds and infusions anywhere, anytime.

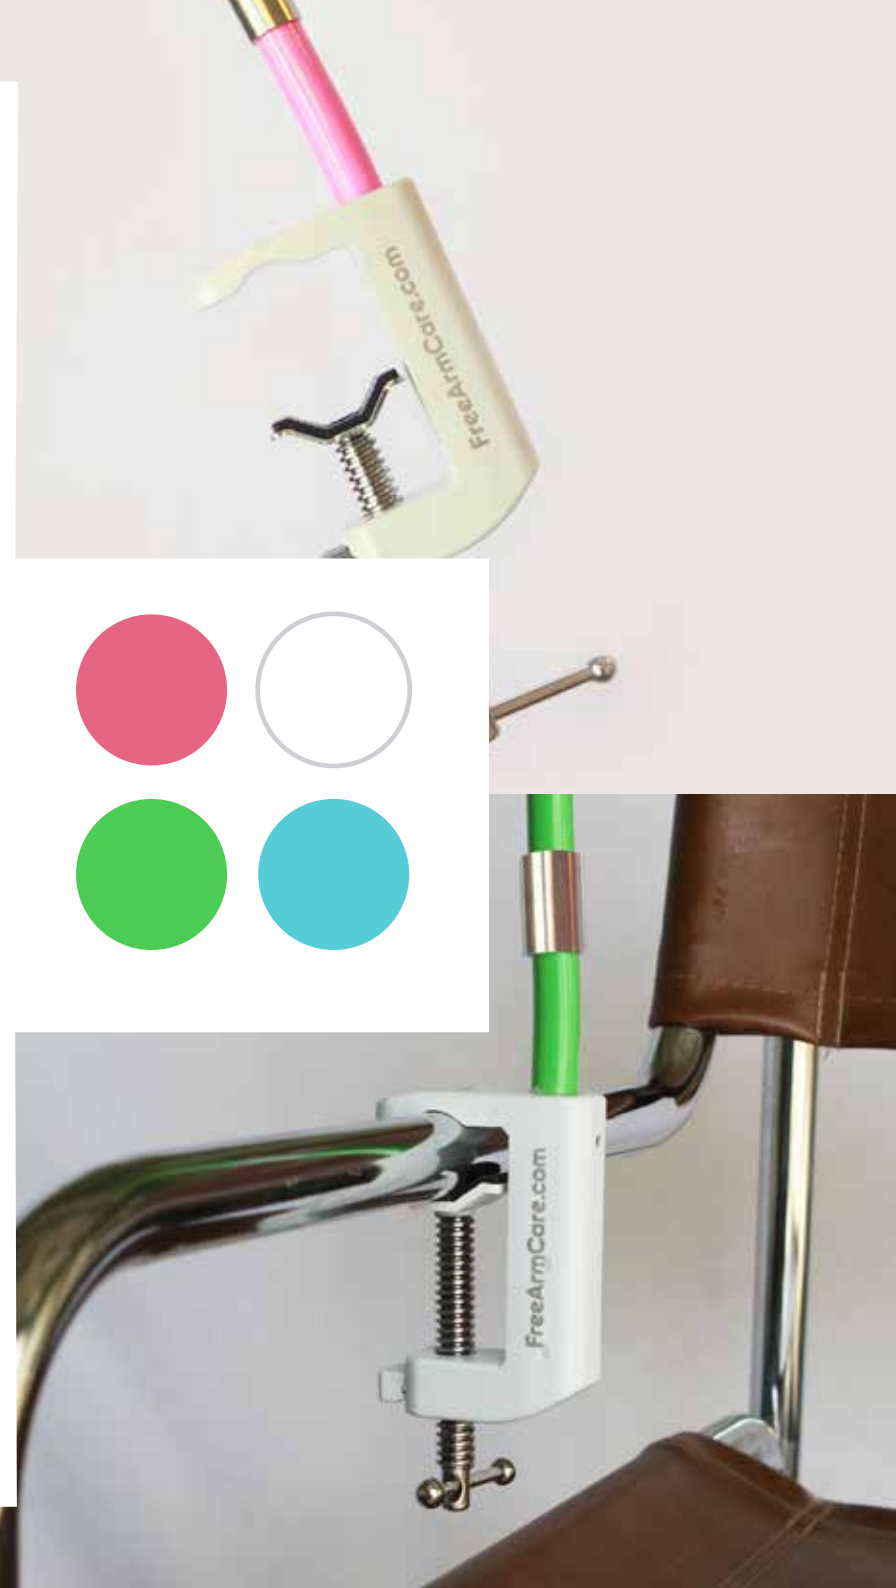

With the FreeArm's bendable arm, you can take the guesswork out of how high to hold the gravity syringe and keep lines free from kinks.

The **FreeArm Muscle** lends a hand at the hospital, home and on the-go; clamps to flat surfaces and rounded bars up to 2 inches thick and bends up easily to fit in your bag. Making eating on the run, a breeze!

Choice of four colours

The **FreeArm Muscle** lends a hand at the hospital, home and on the-go; clamps to flat surfaces and rounded bars up to 2 inches thick and bends up easily to fit in your bag. Making eating on the run, a breeze!

Gravity Feeding

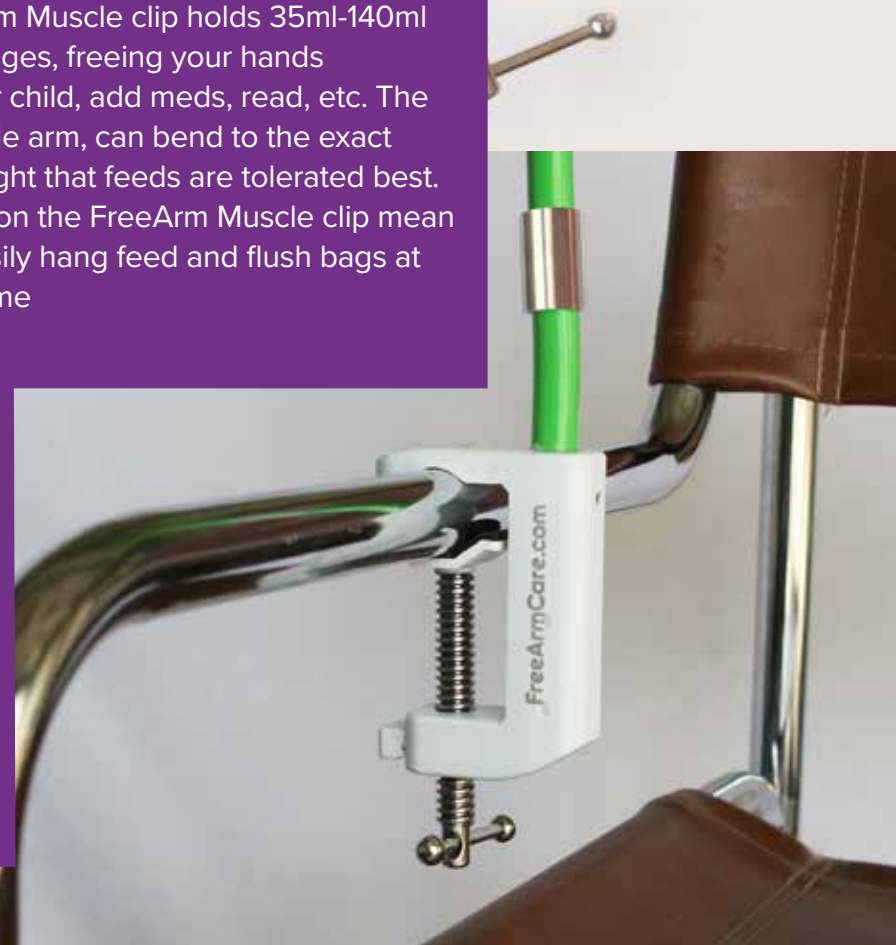

The FreeArm Muscle clip holds 35ml-140ml gravity syringes, freeing your hands to hold your child, add meds, read, etc. The 48cm flexible arm, can bend to the exact feeding height that feeds are tolerated best. Two hooks on the FreeArm Muscle clip mean you can easily hang feed and flush bags at the same time

Benefits

- Clamp attaches tightly to flat surfaces and rounded bars
- Encourages independence and mobility
- Normalises feeding experience with a fun product
- Frees hands during gravity syringe feeding, allows ability to perform therapies, so child can suck as their tummy fills
- Holds open syringe for venting stomach out of the way for improved patient safety
- Consistent feeding rate via gravity syringe with ability to personalise rate with bendable arm
- Secures feeding and infusion pumps during rides
- Provides a continuous way to feed between hospital and home when tube feeding family is discharged home with their FreeArm Muscle

GBUK Group award-winning specialist companies are experts in the provision of enteral feeding, critical care and patient moving and handling products and technologies. GBUK Group companies are suppliers to every UK NHS Trust and to a rapidly expanding export customer base.
